Join with us. To make the world better!

# SAVE THE PLANET TOKEN IS

set to be a non-profit charity token-operated on Binance Smart Chain network. Our ambition is to support people in difficult circumstances by donating to various charities accepting cryptocurrencies worldwide.

**Save the Planet** project will be divided into several distinct phases in which each phase focuses on a specific charitable goal. In phase 1, our team will focus all their resources on the COVID19 epidemic, especially India - a country that is heavily affected by this pandemic recently.

# FEATURE

Charity driven  
project.

Donations to  
charitable  
organizations are  
made every days.

Constant  
communication  
between the team  
and community.

# MARKETING PLAN

Charitable digital marketing campaigns play an essential role in fundraising, building the volunteer base, generating awareness, and building a profile.

We have created main advertising plans for the ""Save The World"" project with a particular expense in each stage. First of all, we will build a solid relationship with many charities or other tokens that have a mutual vision. Social media, including Twitter, Telegram, Facebook Ads, and Tiktok, will be our first choice for posting news or collaborating with other partners to spread the project to people around the world.

In addition, we will hire KOLs (Key Opinion Leaders) on these platforms to attract the users of the above platforms, which assists the development team in mobilizing more funds to operate the project.

In July, we will cooperate with NFT platforms to organize auctions of NFT arts to contribute to the fund for social activities, volunteering to help the poor and disabled children in impoverished countries. Besides, in June, we will contact several CEXs for listing to maximize the visibility of our token. Increasing our exposure to the public is critical to the success of the project.

Therefore, we will need to spend a lot of daily time and support from users to complete the goals set out in the roadmap on schedule.

# TOKENOMICS

Total Supply 1000,000,000,000 \$SAPT

The 10% transactions fee is divided into 3 parts

Redistribute 4%  
tokens to  
SAPT holders

3% tokens  
to the  
liquidity pool

Contribute 3%  
of tokens to  
charities wallet

# CHARITY

Contribute 3% of tokens to charities wallet

As a group, SAPT token holders can nominate organizations and participate in the voting process to decide where these funds will be donated. Before donations are made, the team will thoroughly evaluate all organizations to ensure that our contributions will benefit our cause.

After these stages, the funds will be converted to cryptocurrency (including our tokens) and send directly to the organization's address.
